

Announcement

For more than a decade, Wedholms has been the exclusive supplier of Lely Nautilus milk cooling tanks. Wedholms, with success, has sold horizontal tanks and silo tanks through Lely Centers in many countries across the European continent.

In November 2021, the business relation has been taken to the next level by signing the new Supplier Agreement by Ronald Eikelenboom (CFO of Lely), and Alexander Subotin (CEO of Wedholms).

This Agreement aims to enable an even closer cooperation and further development of the long-term business relationship. We are of course proud that Lely wants to continue to invest in the business relation with Wedholms as a cooling solutions manufacturer. With this great step, enabling closer collaboration between the two companies, we can together develop innovative solutions that benefit dairy farmers around the world – today and in the future.
